0:03-0:28
Xaris Barbarian Warrior:

-Low poly character created for portfolio. Character is 8526 triangles, long dagger is 154, halberd is 172. Textures are 3, 1024² textures for diffuse, specular level, and normal maps. Back, chest, and left forearm were left intact to allow a swap of armor pieces. Used 3DS Max, and Photoshop w/ Nvidia normal map plug-in. Rigged with biped & physique.

0:29-0:32
Siren of the Sea:

-Personal piece created for portfolio from photographic reference for figure in Photoshop.

0:32-0:43
General Thaa-Kor:

-High poly character created in 3DS Max, mostly with editable splines..

0:43-0:46
Commissioned Portrait:

-Painted in Photoshop over approx. 10-12 hours.

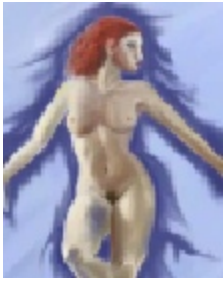

0:46-0:53
Ez-Size Project for Superscape:

-Sub-contracted for Superscape to build realtime model to be used in proprietary web 3d software. About 5k tris, used 3DS Max and Photoshop, rigged with biped & physique.
